

OHIO STATE UNIVERSITY EXTENSION PRESENTS

Farm Accounting Workshop with Quicken®

Does a new year inspire a re-evaluation of how the farm keeps financial records? Maybe Quicken® has been thought about but you think it won't work for a home and a farm business or you would like to see how it works before making the commitment of purchasing.

Quicken® is a simple cash accounting system. This single-entry system allows users to record all income and expenses of both the farm and family. It is popular with farmers due to the ease of data entry and its annual subscription price of \$60 to \$120. Workshop participants will use example farm data to learn how to set up accounts, categorize income and expenses, run tax reports, explore recording farm production data, track income/expenses across tax years, and cash flows by enterprise.

Hands-on workshop uses an OSU Computer Lab with Quicken® Classic Deluxe software installed. Participants receive workshop manual/home reference with each registration. Participants must be familiar with keyboarding and using a computer mouse. This medium-paced workshop will use a variety of farming examples to maximize the learning experience.

Registration is \$60.00 per farm business (2 people per computer). Space is limited to 10 farm businesses at each location. Registration deadline is one week prior to each workshop. **Register and pay at the hosting OSU Extension Office or register online** at: <https://go.osu.edu/quicken> and pay by credit card or pay at the hosting OSU Extension Office.

Course Instructor:
Wm. Bruce Clevenger
OSU Extension Field Specialists,
Farm Management
